[Project No. 15226-000]

#### City of North Little Rock; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On June 28, 2021, the City of North Little Rock filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act, proposing to study the feasibility of the Toad Suck Ferry Lock & Dam Hydroelectric Project No. 15226-000 (Toad Suck Ferry Project, or project), a run-of-river project to be located at the existing U.S. Army Corps of Engineers' Toad Suck Ferry Lock and Dam in Faulkner County, Arkansas. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) An existing reservoir with a maximum water surface elevation of 265.3 feet mean sea level; (2) an existing, 1,450-foot-long lock and dam, including a 1,120-foot-long spillway section with 16, 60-foot-long by 27-foot-high tainter gates; (3) a new headrace intake channel; (4) a new concrete powerhouse housing one, 40-megawatt horizontal turbine-generator unit; (5) a new discharge penstock; (6) a new tailrace receiving flow from the penstock; (7) a new interconnection line to either the existing, 69 kilo-Volt (kV)

Bigelow substation, or the existing, 115-kV Mayflower substation; and (8) appurtenant facilities.
